

Double side aluminum end caps

Cat No.	A	B
RLC 62030	300 mm	150 mm
RLC 62040	400 mm	175 mm
RLC 62050	500 mm	210 mm
RLC 62060	600 mm	225 mm
RLC 62070	700 mm	255 mm
RLC 62080	800 mm	275 mm
RLC 62090	900 mm	275 mm
RLC 62100	970 mm	315 mm

Radius Totem steel base plate

Cat No.	A	B
RTB 62050	600 mm	310 mm
RTB 62060	700 mm	310 mm
RTB 62070	800 mm	355 mm
RTB 62080	900 mm	375 mm
RTB 62090	1000 mm	375 mm
RTB 62100	1070 mm	415 mm

The **Radius Totem** is one of the industry's simplest, smallest/medium sized pylon system giving you the possibility of assembling an interior/exterior pylon within minutes.

The system is based on one strong, closed-up, tube-like profile that makes assembly extremely easy. The horizontal support tubes are simple 40/20 mm square tubes, which are fastened by self-taping screws onto a designed rail.

The side profiles are bolted to the steel based plate with 4 screws each. Wings for extra reinforcement can be added from the inside.

For other/bigger applications it is possible to use two Basic **Radius Light** single sided profiles (RL 60638) and fasten them onto a steel/aluminum square tube structure. This option can also be combined with neon/LED strips in the sides.

Like in all Radius systems, two layers of front panels can be used, in separated parallel rails.
